

Leading the way in intelligent optical inspection and
recognition solutions to secure borders, identify threats,
accelerate throughput
and provide real-time actionable intelligence

Dave Harmon
Director of Business Development
UK and Europe

ddharmon@gatekeepersecurity.com

Secure Borders. Identify Threats. Actionable Analytics.

Innovative solutions that augment the human ability to rapidly and accurately perform multiple security functions simultaneously.

Deployed by many governments worldwide to protect borders, heads of state, military installations, government agencies and critical infrastructure assets.

Tested by the US military, assessed at TRL 9/10 and is approved for global deployment at all DoD facilities and is a US Army Program of Record.

Certified to ISO 9001:2015 standards for quality.

Products have been independently validated and verified against all and certified to be 100% in conformity

Offer the ability to increase throughput, security, and Covid-Safe Contactless/Seamless border controls

Offer the ability to gain a ROI (return on investment) utilising 'Fast Lanes' for Freight and Private Passengers

Gatekeeper Center of Innovation

- Dedicated R&D team located outside of Philadelphia in Newtown, PA
- Development of Gatekeeper's next-generation of Cameras, Illumination, Image processing, User Experience, and Deep Learning AI Intellectual Property
- Lean Product Development Methodology—significantly more agile vs. other companies

Gatekeeper Operating Structure

>2,500+ Installations **>750** International Port of entry lanes

Founded in October 2004

Equipment in 37 countries

Holder of numerous US and International Patents

All technologies are manufactured in the US with all final test, assembly and quality control at the company's Center of Excellence

Worldwide distribution of our technologies is via the Gatekeeper network of certified partners

Global sales and engineering support provided via a network of 7 regional offices as well as 24/7 remote and call center support

Patras Port - Greece

Gatekeeper Lane of the Future Video

Demonstration and Trial and Proof of Concept Support

Thank You
